DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 10-17 are rejected under 35 U.S.C. 102(b) as being anticipated by DE 19520103 (abstract) (herein referred to as "DE '103").

DE '103 teaches alkyl substituted butenol of formula I that is prepared by reacting an aldehyde of formula II with the corresponding lower aldehyde, III, and then reducing the unsaturated aldehyde product IV. The aldol condensation reaction step is carried out in an inert solvent. The reduction reaction step is carried out in the presence of optionally calcined copper-zinc catalyst. DE '103 teaches that the lower aldehyde is propionaldehyde. DE '103 teaches that R1 is a 4-(2,2,3-trimethylcyclopent-3-en-1-yl) group. DE '103 teaches that the organic solvent is toluene.
